

CropNet Grain Data Management System

CropNet Grain Data Management System:

Collects data from the CropScan 3000H, 3000S and 3000B + Sievematic II + Weighbridge Monitor into a PC.

Reads Shape files that contain paddock coordinates and other data re. chemicals and fertilizer.

Stores the data in the Cloud so that it can be accessed from a PC, tablet or smart phone.

Provides Reports:

Yard Storage Map with load by load data for each silo, bunker, shed or bag.

Paddock Maps with Protein, Oil, Moisture and Yield data.

Bin by Bin and Load by Load data referenced against the paddocks.

Outload Records with Load by Load data including price, tonnage, quality and truck rego.

Inload and Outload Storage data with real-time adjustment of running averages for quality parameters and tonnage.

Provides Web Access:

CropNet Web Site provides remote access to on farm data. View real time data from a Smart Phone, Tablet or office PC.

Email PDF files to your customers. End Buyers can bid on parcels of grain stored on farm.
